---

### Profile

Results-oriented Full-stack Developer with 1+ year of experience building scalable web applications using **C#, ASP.NET Core, and React**. Proven track record in optimizing database performance and designing RESTful architectures in Agile environments. Passionate about solving complex backend challenges and delivering intuitive user experiences.

### Experience

#### Full-stack Developer

**Porto Kale Technologies** | Saltillo, Coahuila, Mexico

*Feb 2025 – Present*

- Promoted from Backend to Full-stack Developer role due to rapid adaptation and strong technical performance.
- Architected and developed scalable backend services for a critical Inventory Management System using ASP.NET Core, ensuring data integrity across high-volume transactions.
- Optimized complex SQL Server queries and Entity Framework implementations, reducing query execution time and resolving concurrency issues (deadlocks).
- Integrated React frontend components with existing .NET RESTful APIs, improving application responsiveness and user experience.
- Collaborated in Agile sprints using Jira and Bitbucket, performing code reviews to maintain high quality standards.

#### Full-stack Developer

**Cathedral Software International** | Saltillo, Coahuila, Mexico

*Sep 2024 – Jan 2025*

- Developed and maintained enterprise web applications utilizing C# and ASP.NET, ensuring high availability for business services.
- Designed and implemented robust database schemas in Microsoft SQL Server, optimizing stored procedures for faster data retrieval.
- Built responsive user interfaces using modern JavaScript libraries, translating business requirements into functional frontend features.
- Collaborated with cross-functional teams to identify software bottlenecks and implement performance improvements.

### Education

**Universidad Tecnológica de Coahuila**

TSU en Desarrollo de Aplicaciones Multiplataforma

Relevant Coursework: Data Structures, Advanced Database Management, Software Architecture.

Ramos Arizpe, Coahuila

Graduated: Jan 2025

### Technical Skills

**Programming:** C#, TypeScript, JavaScript, SQL.

**Frameworks & Libraries:** ASP.NET Core, Entity Framework, React.js, Express, Bootstrap, Tailwind CSS.

**Development Tools:** Git, IntelliJ IDEA, Visual Studio Code, Android Studio.

**Database Management:** Microsoft SQL Server, MySQL, MongoDB.

**Tools:** Git, Jira, Bitbucket, Visual Studio, Postman.
